- **Receive Inspiration**  
access to daily positive news stories and free resources
- **Receive Medical Savings**  
access to alternative health plans

# UCA Mission

UCA has a mission called **C.A.R.E.**, which is devoted to helping those who cannot speak for themselves or are not being heard.

**C**hildren: Our CARE projects for children focus on promoting emotional intelligence by providing caring resources, offering caring scholarships and providing caring gifts to young developing minds.

**A**nimals: We team with non-profit projects that are dedicated to the protection and well-being of animals. Projects facilitate animal rescue, animal care and animal sanctuary. UCA CARE projects for animals have saved animal lives through rescue, food and shelter initiatives.

**R**eforestation: We team with non-profit projects that are dedicated to the repair and restoration of our environmental health through reforestation efforts. Projects include tree planting, rain-water harvesting and conservation initiatives. UCA reforestation CARE projects have helped to plant 5,000 trees.

**E**lderly: We team with senior centers to provide meaningful social outings for seniors. CARE projects for Elders have an emphasis on connection and community, in an effort to help combat feelings of loneliness and disconnection. Our Elder program has provided assistance to seniors in need of help covering heating, electricity and burial provisions.

# UCA Movement

Caring is a way to bridge the gap between  
men and women  
all races  
all ages  
animals and humans  
humans and environment.

We can only make progress towards global unification  
if we join together and learn from one another.  
We need to embrace our differences.  
It is with this respect and grace that  
we open the doors to a better way of life.  
Thus, this coats the world with justice and peace
